- 21. (Withdrawn) A method for demonstrating the presence or absence of CRF 1 receptors in a biological sample, said method comprising:
- a) contacting the biological sample with a labeled compound according to Claim 1 under conditions that permit binding of the labeled compound to a CRF1 receptor;
  - b) separating unbound labeled compound from bound labeled compound; and
- c) detecting the bound labeled compound in the biological sample, and therefrom determining the presence or absence of CRF1 receptors in the sample.
- 22. (Withdrawn) The method of Claim 21 wherein the labeled compound is detected using autoradiography.
- 23. (Withdrawn) A method of inhibiting the binding of CRF to a CRF1 Receptor, which method comprises:

contacting a solution comprising CRF and a compound or salt of Claim 1 with a cell expressing the CRF receptor, wherein the compound or salt is present in the solution at a concentration sufficient to inhibit *in vitro* CRF binding to IMR32 cells.

- 24. (Withdrawn) The method of Claim 23 wherein the cell expressing the CRF receptor is a neuronal cell that is contacted in vivo in an animal, and wherein the solution is a body fluid of said animal.
  - 25. (Withdrawn) The method of Claim 23 wherein the animal is a human patient.
  - 26. (Previously presented) A compound selected from:
